

Dear Parents:

Precalculus is a Dual Enrollment class. Students can receive both high school and college credit for this class if they register for Dual Enrollment. Benefits include:

- Save money on college tuition and textbooks (books provided by high school)
- Reduce college completion time by taking General Education and other college classes ahead of time
- Prepare students for college experience and provide momentum for college completion
- Credits transfer to in-state and out-of-state colleges and universities

Please check one of the following:

My student will register for Dual credit for this class.

I understand that college credit can be earned by registering for Dual Enrollment for this class, but my student will not be signing up for Dual credit.
